github.com/russell2231 

Front-end developer with experience in building responsive, and accessible websites. Passionate about developing, and testing web-based applications. Aspiring to use my skills to contribute in a new role.

EDUCATION

Computer Networking

University of Akron

2014 - 2017

Front End Web Development Techdegree

TeamTreeHouse - Certificate 

WORK EXPERIENCE

Stores System Support

Luxottica

2019 - 2020

Achievements/Tasks

- Tracked problematic system errors by implementing various user support tracking metrics.
- Offered technical guidance and advised users of alternative approaches when troubleshooting.

Computer Hardware Technician

Regency Technologies

2017 - 2019

Achievements/Tasks

- Used diagnostic tools to identify hardware failures and replace non-functional components.
- Tested and installed motherboards, processors, and graphics cards on desktops and laptops.

SKILLS

HTML

CSS

SASS

JavaScript

React

Git

Bootstrap

npm

PERSONAL PROJECTS

Invoice App

- An invoicing web app built with React JS and CSS modules. The application manages invoices and allows the user to create, read, update, filter, and delete invoices.

Audiophile

- A dummy e-commerce site for audio equipment, built with HTML, SASS, JavaScript, and React JS. The site allows users to add/remove products from cart, and checkout their cart with stripe added to handle payment with a provided test credit card.

Dine

- A restaurant reservation booking site, built with HTML, SASS, and vanilla JavaScript. Users are able to book a table with date, time, and number of number of people.
